Abstract

200-500 word abstract. Before starting to write, always have the author guidelines/instructions handy.

1. Introduction

1.1 What is the clinical problem, and prior work.

1.2 What is the scientific problem, and prior work.

1.3 What this paper consists of.

1.4 Aims of this paper.

2. Methods

2.1 Data analysis, presentation.

2.2 Model construction.

2.3 Numerical methods.

2.4 Computational software and hardware.

3. Results

3.1 Beautiful result.

3.2 Another result.

4. Limitations

Limitations with respect to your methods

Limitations with respect to wider literature

5. Conclusion

Draw 1 or more conclusions for each of your results.

6. Discussion

93 Discuss each of your results and compare with literature.

94

95 **7. Clinical Significance of Study**

96

97 **Author Contributions**

98

99

100

101 **Acknowledgements**

102

103 LHSC IT, Compute Canada, SharcNET, grant numbers from KCRU, grant numbers

104 from Western, other grants, other sources of funding.

105

106 **Conflict of interest**

107

108 **References**

109

110 Use endnote or other software to populate the list of references. Use templates as

111 required by the journal.

112

113 **Figure Legends**

114

115 **FIGURE 1.**

116

117 **FIGURE 2.**

118

119

119 **FIGURES**

120

121 **1 figure per page, figure number at bottom of page e.g. FIGURE 1.**

122

123

124

125

125 **SUPPLEMENTARY MATERIALS**

126

127 All extra material (figures, derivations, more data analysis, codes) goes to the

128 supplement.
